Need something different? Contact us and we will create a custom plan that works for you!

HOSTING

Service	Cost	Compared To	Details
SSL's	\$49 Billed Annually	\$69 Billed Annually	Secures one website. Strongest encryption on the market, boosts your google search rank as google sees these as safe sites. Required to run financial transactions, recommended for any sites gathering any information, even just a contact form.
Hosting	\$149 Billed Annually	\$249 Billed Annually	We use the best in the business, Dedicated WordPress hosting, built on Solid State Drive Servers. What does that mean? It's top of the line technology. Lightning fast loading and browsing. 99.99% uptime, up to 400,000 monthly visitors. Unlimited space, unlimited pages. Crucial and critical security updates installed and updated automatically. The best part? We make an entire copy of your website and database every 24 hours, so we're always a few clicks away from restoring your website to the last copy made. While the site will be hosted with us you will still have TOTAL control of your website, you'll have your own WordPress log in, and your own FTP (back end access) so at any time you'd like you can use those credentials and download, or move your site, to another host. If you'd like us to do it for you we can certainly help for an additional cost.
Domains	\$10 Billed Annually <small>*some exclusions apply for specialty domains</small>	\$14.99 Billed Annually <small>*some exclusions apply for specialty domains</small>	As web developers, we get special pricing on domains, and we just pass that on to you. Afraid of prices going up year after year on your domain? Renew up to 10 years out, and you're locked in for 10 years. Just \$100 and your domain is paid for the next 10 years. Domains can be bought 1-10 years, with a 10 year maximum due to federal regulations.
Domain Privacy	\$5.99 Billed Annually	\$9.99 Billed Annually	Protects against identity theft, prevents domain-related spam, deters domain hacking, keeps your personal information from being listed in the "WHOis" directory which is required by federal law, without having privacy on the domain. This directory includes things such as the domain owner's name, phone number, email address, and physical address.
SAVINGS	\$168.99/Year	\$342.98/Year	Total Annual Savings= \$173.99
